FOREWORD

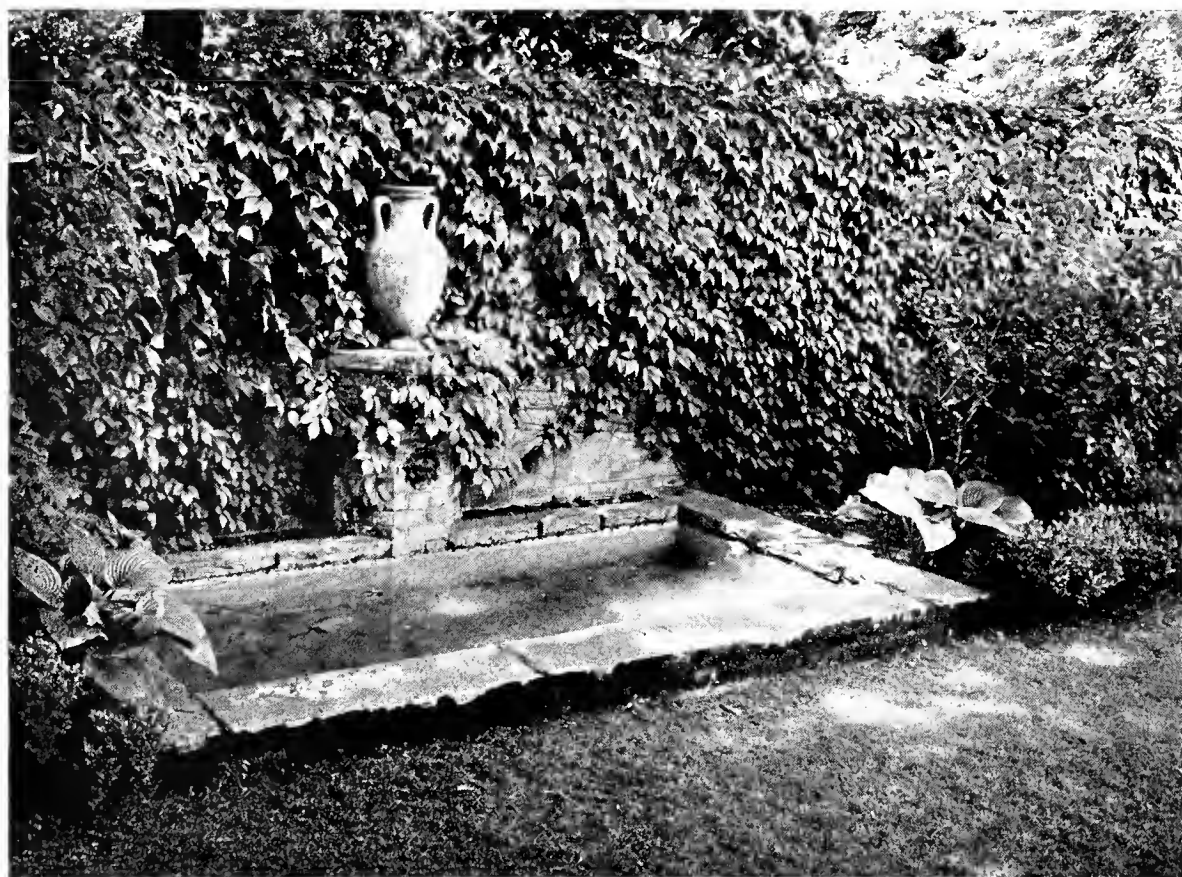

In this catalogue we present a descriptive list of plant material grown here at Westover.

We stand ready to supply you with a superior quality of stock and to offer you our experience in the intelligent solution of your various garden and landscape problems.

Our nursery and two acres of greenhouses are interesting at all times, and whether you are interested in greenhouse plants, annuals or garden material, you will find a visit to Westover a real treat.

We cordially invite you to come and browse around.

WESTOVER NURSERIES

PLANTS OF SPECIAL MERIT

Under this heading we list a few items which we especially recommend. Some of these are new, others just old favorites which we think should be in every garden.

NEW DWARF HARDY ASTERS

These dwarf asters fill a great need in the rock garden, giving masses of flowers during September and October, at a time when there are few dwarf hardy plants in bloom.

The two varieties listed below have proven to be of great merit. They do not grow over 1 ft. in height.

DAPHNE. A lovely pale pink variety	<i>Each</i>	<i>Dozen</i>
VICTOR. Masses of clear lavender flowers.		
Both varieties.....	.35	3.50

ANCHUSA MYOSOTIDIFLORA. This dwarf Anchusa with its massive foliage and bright blue Forget-Me-Not flowers deserves a place in every garden. It blooms for a long period beginning in early May and lasting well into June.....	.35	3.50
---	-----	------

ARABIS ALPINA FLORO PLENO. This double rock cress is a charming subject for the rock garden or front of border. The pure white double flowers are borne in spikes resembling miniature stock. It blooms during May and remains in flower long after the single variety is through blooming.....	.35	3.50
--	-----	------

DIATHUS CAESIUS. fl. pl. This tiny double garden pink is invaluable for the rockery. They form very dwarf tufted mats of gray foliage from which rise the charming double pink flowers on very short stems.....	.35	3.50
--	-----	------

DORONICUM MME. MASON. This Doronicum is truly a beautiful hardy plant. The yellow daisy-like flowers are lovely in combination with Spring flowering bulbs. No garden should be without a few of these.....	.35	3.50
--	-----	------

ELSHOTZIA STAUNTONII. This little shrub was introduced by the Arnold Arboretum at Boston a few years ago. It has aromatic foliage and produces masses of rose pink flower spikes during late Summer and early Autumn. When established, the plants will grow to a height of from four to five feet, which makes them equally valuable for the background of the borders or for the shrubbery border. We offer strong plants at50	5.00
---	-----	------

GAILLARDIA SUNGLOW. This new Gaillardia is pure golden yellow and the enormous flowers are carried on long		
---	--	--

heavy stems which makes it a very valuable cut flower. Those who dislike the hitherto reds in Gaillardias will welcome this new addition. It is a very free flowering variety and we cannot recommend it too highly.....	.50	5.00
--	-----	------

VERONICA ARMENA. This little Veronica is one of the most charming subjects for the rock garden. It forms dense mats of dark green foliage, which is evergreen and pretty at all times. The plants are literally covered with small bright blue flowers for about six weeks beginning to bloom in late April. We cannot recommend this plant too highly.....	.35	3.50
--	-----	------

VERONICA LONGIFOLIA SUBSESSILIS. This is one of our most beautiful hardy plants for the border or formal garden. The deep blue flowers are borne on graceful spikes about two feet in height. Blooms from July to September at a time when there are very few good blue flowers in the garden. Strong plants.....	.35	3.50
--	-----	------

VERONICA SPICATA TRUE BLUE. This Veronica grows about 15 inches high and produces spikes of deep blue flowers during June. If cut down after blooming, they will bloom again a second and third time.....	.35	3.50
--	-----	------

PHLOX COLUMBIA. The loveliest pink phlox in existence (U. S. plant patent No. 18). The foliage is rich, dark green, and the plant does not grow over 2½ feet in height. Very delicate salmon pink in color and mildew resistant.....	.50	5.00
---	-----	------

BUDDLEIA HARTWEGII. This new Butterfly bush is a great improvement over the old variety. The long panicles of lavender flowers are of a lasting quality. It is a lovely shrub for the garden and also invaluable for cutting. Unlike the other Buddleias it is perfectly hardy.....	.75	7.50
--	-----	------

CHRYSANTHEMUM ARCTICUM. This dwarf hardy plant should be used a great deal more both in the rock garden and hardy border. During October these plants are entirely covered with pure white single flowers, and the foliage is neat and attractive throughout the Summer. Does not grow more than one foot in height.....	.25	2.50
---	-----	------

THE HERB GARDEN

Before the days of bottled extracts, flavors and perfumes, our ancestors used herbs for the purpose of flavoring food and beverages; to scent clothes and for medicinal purposes. Our great-grandmothers knew how to use the herbs, but with the growth of the chemical industries, the knowledge and use of herbs has almost become a lost art.

In recent years, this loss has become recognized and old books have been brought to light and new ones written to enable us to again have that keener enjoyment of living.

Aside from being extremely interesting, the herb garden brings to us many pleasant memories and sentiments.

The following is a list of hardy herbs:

	Each	Dozen
ASPERULA ODORATA —(Sweet Woodruff). Hay scented leaves used to flavor wines. The plant is very useful as a ground cover in shady places.30	3.00
ANTHEMIS NOBILIS —(Camomile). A soothing tea is made from the dried leaves.20	2.00
ARTEMESIA ABSINTHIUM —(Common Wormwood). Leaves flavor medicines and de liqueur Absinthe.20	2.00
ARTEMESIA PONTICA —(Roman Wormwood). Silvery gray, aromatic foliage used medicinally.25	2.50
ARTEMESIA ABROTANUM —(Southern wood). Dried branches laid in wardrobes will keep moths away.30	3.00
ARTEMESIA DRACUNCULUS —(Tarragon). Tops and leaves used in salads and sauces; also to make a vinegar.30	3.00
CIMICIFUGA RACEMOSA — (Black Snake Root). The root of this plant was used by the Indians to cure snake bites.25	2.50
CALAMINTHA ALPINA —(Alpine Savory). Fragrant mat-like foliage and masses of mauve colored flowers.25	2.50
CHRYSANTHEMUM BALSAMITA —(Costmary). The dried leaves make a tea.35	3.50

CENTRANTHUS RUBER . A plant of the Medieval herb-garden.25	2.50
LAVENDULA VERA — (Sweet Lavender). The dried leaves are used for scenting linens and potpourris.25	2.50
MENTHA PIPERITA — (Peppermint). Leaves may be used in cooling drinks.25	2.50
MENTHA SPICATA — (Spearmint). Fresh leaves used to flavor sauces and iced drinks.20	2.00
MENTHA REQUIENI . A very prostrate mint, useful for crevices of flagging.20	2.00
MENTHA ROTUNDIFOLIA — (Apple mint). The leaves are used to flavor drinks.30	3.00
MENTHA PULEGIUM —(American Pennyroyal). Leaves used medicinally and for seasoning.25	2.50
MARRUBIUM VULCARE — (Horehound). Dried leaves make a tea and remedial candy is made from the fresh leaves.25	2.50
MONARDA DIDYMA —(Bee Balm). Very aromatic foliage and deep red flowers. The seeds are used in potpourris.25	2.50
NEPETA CATARIA —(Catnip). An invigorating tea is made from the dried leaves.20	2.00
SATUREIA MONTANA —(Winter Savory). Leaves season meats, sauces, vegetables and certain liqueurs. An excellent plant for edging borders.25	2.50
SANTOLINA CHAMAECYPARISSUS —(Lavender Cotton). A very fragrant gray-green plant which may be clipped for edging.25	2.50
TEUCRIUM CHAMAEDRYIS —(German-der). An excellent herb for edging the herb garden. Shiny green foliage.20	2.00
SALVIA OFFICINALIS —(Garden Sage). The dried leaves season meats, stuffings and cheese.20	2.00
THYME . This is a very interesting class of plants, all of which may be used for seasoning. For full list of these, see page 14.		
VALARIANA OFFICINALIS — (Garden Heliotrope). Fragrant plants of the medieval herb garden; also useful for cutting.25	2.50

SPRING FLOWERING BULBS

We import a complete assortment of Spring flowering bulbs for Fall planting, of which we issue a descriptive price list during the Summer.

Our rock garden and formal garden are planted with a great variety of Spring flowering bulbs in combination with perennials. To see these gardens in their Spring glory is a real treat and our friends and customers are always welcome.

ALYSSUM AND ARABIS

GENERAL LIST OF PERENNIAL AND ALPINE PLANTS

All plants are strong, field-grown clumps except a few varieties which are better from pots. Six plants of one variety supplied at dozen rates; 25 plants of a variety supplied at 100 rate. Three plants of one variety supplied at dozen rate when 12 or more plants are purchased. Special prices quoted on larger quantities.

	Each	Dozen
ACHILLEA—Argentea. Has silvery foliage from which spring pure white flowers in clusters on 8 inch stems. June-July.	\$.25	\$2.50
Ptarmica—Boule De Neige. A splendid cut flower with masses of pure white flowers somewhat resembling double baby's breath. Of spreading habit, growing 24 inches high.25	2.50
Tomentosa. A lovely plant for the rock garden, with dense mats of green foliage and masses of deep yellow flowers during June and July. Height—6 inches.25	2.50
Filipendula. Finely cut, green foliage and clusters of deep yellow flowers. 3 ft. June-July.25	2.50
ACONITUM — Fisheri — (Monkshood). Deep blue flowers on 3 ft. stems with deep glossy foliage. September.25	2.50
AETHIONEMA — Grandiflora (Persian Candytuft). Of shrubby habit with bluish gray foliage and lavender pink flowers. 8 inches—June 30th.30	3.00
AGROSTEMMA — Coronaria. A stiffly branching plant with gray foliage and deep crimson flowers on 2½ ft. stems. June-July.25	2.50
AJUGA—Atropurpurea. A fine plant for semi-shady places in the rock garden with deep blue flowers and bronzy foliage close to the ground. May-June.25	2.50
Reptans. The flowers are similar to the		

foregoing variety but the foliage is dense green. This is a fast spreader and is an excellent ground cover for either sun or shade.

Each Dozen

.25 2.50

Reptans Variegata. A variety with lovely variegated foliage somewhat slower growing than the other varieties. A fine rock plant.

.30 3.00

ALYSSUM—Saxatile Compactum. This is one of the most satisfactory plants for the border or rock garden. Masses of showy yellow flowers during May. One foot.

.25 2.50

Saxatile Citrinum. A lovely pale yellow variety.

.45 4.50

Serpyllifolium. A gem for the rock garden with compact, gray hoary foliage and lovely sulphur yellow flowers. 4 inches. June.

.25 2.50

ANCHUSA—Italica Dropmore. A rather coarse plant with masses of beautiful gentian blue flowers during May and June. A lovely subject for the back of the border. 4-5 ft.

.25 2.50

Myosotidiflora. This is a lovely hardy plant from China, which is very useful for both the rockery and border. The flowers are bright blue and resemble the Forget-me-not, rising above bold, deep green foliage. Splendid in combination with Spring bulbs. 1 ft. May-June.

.35 3.50

ANEMONE—Pulsatilla—Pasque Flower. Well adapted to the rock garden, where it can have a deep root run. Nodding lilac colored flowers, May.

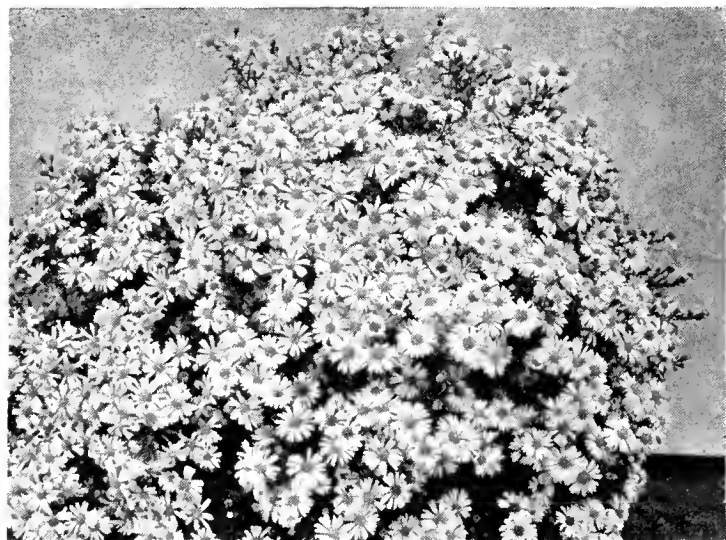

.30 3.00

ANTHEMIS TINCTORIA. Golden yellow marguerite, flowering throughout the entire season. Very good cut flower. 2 ft.

.25 2.50

AQUILEGIA—(Columbine)

	<i>Each</i>	<i>Dozen</i>
Coerulea. This is the Rocky Mountain Columbine with blue and white flowers, having long spurs. 2 ft. May.....	.25	2.50
Chrysantha. A strong growing variety with deep yellow flowers, coming into bloom somewhat later than other varieties but remaining in bloom for a long time.....	.25	2.50
Flabellata Nana Alba. Pure white flowers with light green foliage, growing only 8-10 inches high.....	.25	2.50
Long-Spurred Hybrids. We can supply these in separate shades of pink, orange and blue.....	.25	2.50
Mrs. Scott Elliott Hybrids. A strain of long-spurred hybrids in a great assortment of colors, containing the most unusual pastel shades. Strong plants.....	.35	3.50
ARABIS ALPINA. Pure white flowers; fine for the rock garden or front of border. 6 inches. April-May.....	.25	2.50
ARENARIA CAESPITOSA. Moss-like foliage from which rise dainty white flowers on 1 inch stems. Fine for the rock garden or between flagging.....	.25	2.50
ARMERIA MARITIMA SPLENDENS. Low tufted plants with round, pink flowers on 6 inch stems, beginning to bloom in May and continuing all Summer.....	.25	2.50
ARMERIA BEE'S RUBY. A very pretty variety with large flowers of a clear rose pink. We have found this variety to bloom three times during a season.....	.35	3.50
ARTEMISIA LACTIFLORA. A lovely, hardy plant for the back of the border with sprays of creamy-white flowers. The plants grow into large clumps, 5-6 feet high. Very fragrant. September.....	.25	2.50
Silver King. Pretty silvery gray foliage which is lovely in the garden in combination with purple flowers and also very useful for cutting. 3 ft.....	.30	3.50
ASCLEPIAS TUBEROSA. This is the native orange-colored Butterfly-weed. A very pretty garden plant. 2 ft. August.....	.25	2.50
ASPERULA ODORATA. A charming herb with pretty finely cut foliage and masses of tiny white flowers during May. It prefers a somewhat shady place.....	.30	3.00

DWARF HARDY ASTERS

HARDY ASTERS

Michaelmas Daisies

No perennials are more worthy of a place in the garden than the Hardy Asters. Most varieties come into bloom from late August until late September. They make a glorious display in the garden background. They are of easiest culture and should be known better. We offer the following varieties:

	<i>Each</i>	<i>Dozen</i>
Novi-Belgi—Climax White. Masses of white flowers during September. Fine for naturalizing. 4-5 ft.....	.25	2.50
Feltham Blue. A lovely blue hardy aster. 4-5 ft. September.....	.25	2.50
Freedom. Large trusses of blue, semi-double flowers. A very good variety. 4 ft.....	.25	2.50
Red Rover. An unusual color in hardy asters, large flowers in profusion. Height 3-4 ft.....	.35	3.50
Royal Pink. A splendid companion for Skyland's Queen. Of a little dwarfer habit. A profusion of soft pink flowers.....	.35	3.50
Snowdrift. Branching pyramids of large snow-white flowers. A very fine white variety. Early September. 3 ft.....	.35	3.50
Skyland's Queen. This is a lovely variety with flowers of a beautiful shade of blue, completely covering the plants from late August on. The flowers are quite large and of a fine lasting quality. Also splendid for cutting. Height 3½-4 ft.....	.35	3.50
ASTER ALPINUS. The Alpine Asters bloom during May and clumps of these are most effective in the rock garden. They grow about 6 inches high.		
Albus. A white with yellow center.....	.25	2.50
Blue. A lovely sky blue variety.....	.25	2.50
Wartburg Star. A somewhat taller growing variety with large sky blue flowers on 15-inch stems. Very good border plant and cutflower.....	.35	3.50
MAUVE CUSHION. A very strong growing aster with masses of pale mauve colored flowers during October. The plants are of spreading habit and should be divided every year for best results.....	.25	2.50
ASTILBE—Arendsi—(Spiraea). The Astilbes are very useful garden plants as they bloom during July when most of the May and June flowering perennials have gone by and they also supply shades of pink, so scarce among perennials.....	.50	5.00
Gladstone. Fine white flowers in large pyramidal heads. 2 ft.....	.50	5.00
Gloria Superba. A very vigorous grower with brilliant pink flowers 2½ ft. Strong clumps.....	.50	5.00

Peach Blossom. A splendid variety of a light pink shade. 2½ ft. Strong clumps.

Each	Dozen
.50	5.00

Queen Alexandra. A very good medium pink variety.

Each	Dozen
.50	5.00

AUBRETIA—Deltoidea hybrids. One of our prettiest rock garden plants with masses of small flowers in many unusual shades of mauve, blue and purple. Also a good wall plant. May and June.

Each	Dozen
.25	2.50

BAPTISIA—Australis—(False Indigo). Spikes of blue flowers during May and June resembling the Lupines. Very neat foliage throughout the season. 2 to 3 ft.

Each	Dozen
.25	2.50

BOLTONIA—Latisquama. A tall growing perennial resembling the Hardy Aster but with more feathery flowers. Light lavender pink. 5 to 6 ft. August and September.

Each	Dozen
.25	2.50

CAMPANULAS

Carpatica—(Harebell). A very useful plant for the rock garden or front border, with light blue cup-shaped flowers during July. If cut down after flowering a second crop of flowers will appear. 1 ft.

Each	Dozen
.25	2.50

Carpatica Alba. A pretty white variety.

Each	Dozen
.25	2.50

Persicifolia—(Peach leaved Bellflower). This is a lovely Campanula with spikes of light blue bell-shaped flowers during June. Very effective. 3 ft.

Each	Dozen
.25	2.50

Persicifolia Alba. A pure white variety of the above.

Each	Dozen
.25	2.50

Medium—(Canterbury Bells). We can supply these in separate colors of pink, light blue, deep blue and white.

Each	Dozen
.25	2.50

Medium Calycanthema. This is the cup and saucer variety in blue, pink and white.

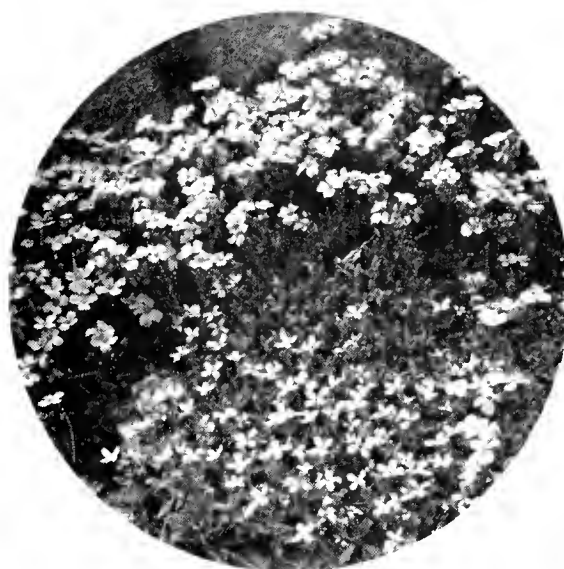

Each	Dozen
.25	2.50

Rotundifolia Olympia. Improved Scotch Blue Bell. Those who are acquainted with the old Scotch Blue Bell will welcome this great improvement, with large, deep lavender flowers.

Each	Dozen
.35	3.50

ALYSSUM CITRINUM

AUBRETIA DELTOIDEA

DOUBLE ARABIS

CENTAUREA—Dealbata. A pretty hardy cornflower with pink, thistle-like flowers during June and July. 18 inches.

Each	Dozen
.25	2.50

Montana. The popular blue cornflower or Bachelor's Button blooming for a long period. Deep blue. 2 ft.

Each	Dozen
.25	2.50

Macrocephala. A rather coarse growing plant with glorious thistle flowers on stems from 2 to 3 feet high. A very good border plant. July

Each	Dozen
.25	2.50

CERASTIUM—Tomentosum—(Snow-in-Summer). An invaluable plant for the rockery or dry wall, with pretty gray foliage which is completely covered with pure white flowers. Late May and early June. Trailing

Each	Dozen
.25	2.50

CHEIRANTHUS—Allioni—(Siberian Wall Flower). Brilliant orange flowers during May. If cut down will bloom a second and third time. 6 inches. Biennial

Each	Dozen
.25	2.50

CHRYSANTHEMUM—Maximum—Alaska—(Shasta Daisy). The Shasta Daisy deserves a place in every garden. Excellent for cutting. July-August. 2 ft.

Each	Dozen
.25	2.50

Maximum—Fl. Pl. This is the double flowered Shasta Daisy with enormous double shaggy blooms.

Each	Dozen
.35	3.50

NEW HARDY KOREAN CHRYSANTHEMUMS

This new class of Chrysanthemums has gained great favor among the flower-loving public and we cannot recommend them too highly.

SINGLE VARIETIES

	Each	Dozen
APHRODITE. A very lovely variety of ivory, tinted with pale pink; so completely covered with flowers that only blossoms are visible. The plants are of compact growth with a spread of three feet across. The flowers are fully three inches in diameter. An excellent subject for the background of a rockery. In bloom by October 5th.50	5.00
APOLLO. Single bronze, red and gold35	3.50
CERES. Chamois-yellow and gold35	3.50
DAPHNE. Lovely Daphne pink35	3.50
HEBE. A lovely luminous pink with a silvery halo surrounding the golden yellow center. This variety is one of the first to bloom and lasts well through late September and October. One of the finest Korean hybrids50	5.00
LOUISE SCHLING. This is a beautiful single Chrysanthemum of an unusual burnt red. One of the finest30	3.00
MARS. Deep amaranth red35	3.50
MERCURY. Coppery bronze and red35	3.50
SATURN. Brilliant orange and bronze with golden yellow center. It is very free and effective. The large flowers are produced in graceful sprays. In bloom by October 5th.50	5.00
VENUS. A new and attractive shade of pink with rosy lavender shading. It is remarkably free, with slender branches which carry a multitude of blossoms. The flowers last for a long period and begin to bloom in late September.50	5.00

DOUBLE VARIETIES

ROMANY. The color is between carmine and nopal red with bronze tone. Large double flowers of perfect form. A lasting cut flower. October 5th.50	5.00
JUDITH ANDERSON. A new garden pompon in bloom by October 5th. Dwarf in habit but with good spread. The flowers are round in form and about one and one-half inches across. The color is a clear buttercup yellow. In full flower by October 5th.50	5.00

HARDY CHRYSANTHEMUMS GENERAL LIST

	Each	Dozen
ALICE HOWELL. A good orange yellow. Anemone type. Blooms in early October.20	1.75
CAVALIER. A dazzling single chrysanthemum of rich vermillion red. It makes a gorgeous show in the garden from October 15th on.25	2.50
DAYBREAK. A soft shell pink. A variety that is very nearly single. Fine as a cut flower. Early October.20	1.75

GANNA. A large flowering deep rose variety, rather tall growing. Mid-season.20	1.75
GOLDEN CLIMAX. A good yellow pompon variety of neat growth and medium height. Mid-season to late.20	1.75
JEAN CUMMING. Large pure white flowers. Of medium height and erect growth. Begins to flower about September 15th and lasts over a long period.25	2.50
JEAN TREADWAY. A very pretty decorative type, three inches across. The color is a lovely pink with darker rose pink center. Medium height; in bloom September 30th.25	2.50
MITZI. Very small yellow flower with deeper center. Mid-October.20	1.75
MULDOON. A pompon of deep garnet color. Rather late flowering.20	1.75
NUGGET. A rather dwarf yellow button variety. Starts to bloom in mid-October.20	1.75
OCTOBER GIRL. A profuse bloomer of branching habit. Large semi-double flowers which are pink at first and shaded with lavender as they mature.20	1.75
RUTH CUMMING. An old-favorite of reddish-bronze color shaded terra cotta. A very fine variety in bloom by October 10th.20	1.75
RUTH HATTON. An ivory white pompon variety. Very good. In full bloom October 10th.20	1.75
R. MARION HATTON. Early bright canary yellow. Decorative pompon.20	1.75
SEPTEMBER QUEEN. An excellent pure white, early variety, coming into bloom about the middle of September. Dwarf growth.20	1.75
YELLOW GEM. A very good dwarf yellow pompon coming into bloom by the end of September.20	1.75

YELLOW NORMANDIE. Though not a new variety, we consider this one of the best. It is the earliest to come into bloom and continues until heavy frost. The color is light bronzy yellow and the flowers are large. Dwarf habit.25	2.50
--	-----	------

* * * *

CONVALLARIA — Majalis — (Lily of the Valley). We can supply these in strong clumps at30	3.00
COREOPSIS — Grandiflora. The well known Coreopsis is an excellent cut flower, blooming throughout the entire season. Golden yellow flowers.25	2.50

DELPHINIUMS

The Delphiniums are truly aristocrats of the garden. Our stock is free of disease and the plants are all sturdy, young plants—the right size for planting in the garden. We do not advise planting enormous old clumps of Delphinium as such plants usually do not give the purchaser more than one year.

Delphiniums like a well drained garden soil. Do not apply fresh manure but well decayed cow manure and

DELPHINIUM

bone meal are an excellent fertilizer. An application of wood ashes in the crown of the plant, after the first flower stalks have been cut, will prevent crown rotting.

Westover Hybrids. This is a very fine strain of sturdy growth, ranging in many shades of deep and light blue, growing to a height of from 5-6 ft.40 4.00

English Wrexham Hollyhock Strain. Enormous spikes of double flowers ranging in many colors of blue; mauve and lavender, pink shades.50 5.00

For those who desire extra heavy clumps, we can supply these at 1.00 10.00

DAPHNE—Cneorum—(Garland Flower).

This lovely plant is becoming more popular every year, and deserves a place in every rockery or border. They grow into beautiful specimens, and during May they are completely covered with sweet scented flowers of a charming shade of pink. They usually give a second crop of flowers in the fall. Give light protection during the Winter. We can supply these in the following sizes:

6-9 inches.....	.60	6.50
9-12 inches.....	1.00	10.50
12-15 inches.....	1.50	16.00

DIANTHUS—(HARDY PINKS).

Deltoides—(Maiden Pinks). Mats of deep green foliage and masses of deep red flowers during June. 6 inches..... .25 2.50

Deltoides Alba. A pure white variety. More desirable than the foregoing on account of its color.25 2.50

Plumarius. This is the favorite garden pink, ranging in color from white to deep red. Both single and double.25 2.50

Caesius—(Cheddar pink). A very valuable little Dianthus forming compact cushions of gray foliage from which rise

masses of single, pink flowers in June. 6 inches.	Each .30	Dozen 3.50
--	----------	------------

Sundermanni. An interesting Macedonian species with large white flowers. .35 3.50

Barbatus—(Sweet William).

Newport Pink. A lovely salmon pink variety.25 2.50

Scarlet Beauty.25 2.50

White.25 2.50

Nana Compacta. This is a very dwarf Sweet William, growing about 5 inches high in a mixture of colors only. Splendid for rock gardens.25 2.50

DICENTRA—Eximea. (Ever blooming Bleeding Heart.) This variety blooms through the entire Summer, and forms neat clumps of dark green feathery foliage. Will do in semi-shade.35 3.50

Spectabilis—(Bleeding Heart). This old fashioned favorite deserves a place in every garden. Strong plants.40 4.00

DICTAMNUS—Fraxinella Alba—(Gas Plant). The gas plant is a very permanent, hardy perennial and does not like to be disturbed. They are most desirable border plants, forming beautiful clumps with pure white flowers in July. 2 ft.50 5.00

DIGITALIS—(Foxglove). These old garden flowers are stately and elegant in June when they produce tall flower spikes in white, purple and pink. Foxgloves are biennial, but usually self sow. .25 2.50

Grandiflora. This is a pale yellow variety, somewhat different from other foxgloves, not only in habit, but in that it is a true perennial.25 2.50

DORONICUM—Caucasicum. One of our prettiest hardy perennials, with masses of yellow, daisy-like flowers on long stems, lending themselves well to cutting. 2-3 ft. May-June.30 3.00

Clusi. This is a pretty dwarf species with somewhat smaller flowers, 8 inch stems. A very good rock garden subject. .35 3.50

ERYNGIUM—Amethystinum—(Sea Holly). This is the true blue Thistle, with amethyst stems and flowers. At its best during July and August. 2 ft.30 3.00

Planum. Branching heads of steel-blue flowers about 30 inches high. July-August.25 2.50

ERYSIMUM—Pulchellum—(Fairy Wall Flower). A good rock plant growing about 6 inches high. The flowers are sulphur yellow.25 2.50

EUPATORIUM—Ageretoides. A good border plant with pure white Ageratum-like flowers during August and September. An excellent cut flower. 4 ft.25 2.50

Coelestinum. This lovely perennial of spreading habit is often called Hardy Ageratum as the flower resembles the latter in form, although of a deeper lavender-blue. It is not only a very valuable border plant blooming in September and early October, but it makes an excellent cut flower. 18-24 inches.25 2.50

WESTOVER NURSERIES

	Each	Dozen		Each	Dozen
EUPHORBIA — Polychroma. A lovely early Spring flowering perennial, growing into beautiful plants with flowers which turn from greenish yellow to a deep yellow during May. 1 ft.35	3.50	Repens. A very good plant for the rock garden, of trailing habit with masses of small pure white flowers in June.....	.25	2.50
Myrsinitus. This is a very interesting plant resembling a glorified Sedum with gray leaves and long stems which creep over the ground. Pale yellow flowers in early April. An excellent wall plant.25	2.50	HELENIUM—Hoopsii. Unlike the well known popular Autumn blooming varieties, this blooms in July with long yellow daisy-like flowers. A very good border plant. 2 ft.25	2.50
FESTUCA—Glaucia Nana. A lovely dwarf variety of our grasses with glaucous foliage not over 6 inches, making it a very good rock plant.25	2.50	Riverton Beauty. Rich lemon yellow flowers in masses during August and September. 5 feet.30	3.00
FUNKIA — Lancifolia Variegata. Large green leaves edged with white and lilac flowers on long stems. Very valuable for edging.25	2.50	Riverton Gem. A beautiful mahogany variety. Excellent for cutting. August-September. 5 feet.30	3.00
Subcordate Grandiflora— (White Plantain Lily). A lovely variety with attractive pale green foliage and pure white lily-like flowers during August. Excellent for border or rockery.30	3.00	HELIANTHEMUM — Mutabile— (Rock-rose). One of our loveliest plants for the rock garden or dry wall, of shrubby habit with evergreen foliage and masses of flowers resembling single roses, ranging in color from pure white to deep rose with many unusual pastel shades. 6 inches. May-June.30	3.00
GALIAM VERUM. This hardy plant forms masses of finely cut foliage which is attractive at all times. Deep greenish-yellow flowers during the Summer months.25	2.50	HEMEROCALLIS — Dr. Regel — (Day-Lily). Deep orange flowers, very fragrant. A beautiful variety. 2 feet high. June-July.25	2.50
GAILLARDIA—Grandiflora. The Gaillardia or Blanket Flower is one of our most useful cut flowers, blooming throughout the entire Summer. It varies a great deal in color through shades of yellow and orange-red. 2 ft.25	2.50	Flava— (Lemon lily). The flowers are a lovely shade of lemon yellow, one of the best varieties. 2 feet high. June-July.25	2.50
GERANIUM—Pratense. A lovely variety of the Crane's Bill family with flowers of a pretty blue shade. Very good for border or rock garden. 1-2 feet.30	3.00	The Hemerocallis are very good subjects for planting along a stream or pool.		
GEUM—Atrosanguineum. Dark red flowers on good stems 18 inches high. June-July.25	2.50	HEUCHERA—Sanguinea— (Coral Bells). A lovely border plant also good for cutting. Graceful sprays of coral-red flowers. 2 ft. July.25	2.50
Mrs. Bradshaw. Large double orange-red flowers. Very good. 18 inches high. June-July.25	2.50	HIBISCUS— (Mallow). The giant flowering Hibiscus are very useful for the shrubby border where they will give color late in the season. Though the plants die down to the ground each year, they attain a height of six feet. We can supply these in red, white and pink.30	3.00
Lady Stratheden. A lovely golden yellow variety. 18 inches high. June-July.25	2.50	HOLLYHOCKS		
Heldreichi. This variety blooms during May with bright orange flowers, growing only from 10-12 inches high, which makes it a lovely rock plant.30	3.00	DOUBLE—Newport Pink25	2.50
Borisii. Dwarf orange scarlet variety with large flowers and round heavy leaves. One of the best Geums.30	3.00	Scarlet25	2.50
GLOBULARIA — Trychosantha. A very pretty little rock plant, with neat dark green foliage, from which an abundance of blue button-like flowers on 6 inch stems appear during May and June.25	2.50	White25	2.50

SAPONARIA—Occymoides. A lovely rock plant covered with pink flowers during June. 6 inches.25	2.50
Occymoides Alba. Light green foliage and pure white flowers.30	3.00
SATUREIA—Alpina. A pretty low-growing herb with numerous mauve-colored flowers during June. A good subject for the rockery.25	2.50
SAXIFRAGA—Megasea. Forms masses of handsome foliage. Good for the rock garden or front of border. Spikes of rose colored flowers.30	3.00
Caucasica House's Hybrids. This is a strain with enormous flowers in lovely shades of blue. A great improvement.35	3.50

SEDUMS

The Sedums are invaluable for the rock garden and among them there are many interesting varieties that are ever-green and lovely in tone during the cold weather.

Acre. A fast spreading variety completely covered with yellow flowers, during June.	<i>Each</i> .25	<i>Dozen</i> 2.50
Lydium. This is a gem with bright green foliage, turning red in the autumn.25	2.50
Album. Pretty dark green foliage and white flowers. Will grow in the shade.25	2.50
Dasyphyllum. Pretty gray foliage. Must be planted in a cool place as it does not like hot weather.25	2.50
Muralis. Not unlike Sedum Album but with bronze-green foliage.25	2.50
Sarmentosum. A very rapidly growing variety, good for covering barren spaces. Yellow flowers.25	2.50
Spectabilis. A late blooming Sedum with large heads of rose pink flowers during September. 1 ft.25	2.50
Spurium Coccinus. Deep red flowers. Very good.25	2.50
Sieboldi. This is one of the prettiest of the Sedums, forming handsome tufts of foliage, the edges of which turn red in the autumn. Masses of pink flowers in September.30	3.00
SEMPERVIVUM—(Houseleek). An interesting class of plants, known by many as Hen and Chickens. All Sempervivums throw up flowers on long stems when established.		
Arachnoideum. This is the cobweb variety, forming clumps of gray rosettes covered with a gray web.25	2.50

WESTOVER NURSERIES

Tectorum. The common houseleek found on the roofs of European cottages.	<i>Each</i>	<i>Dozen</i>		
	.25	2.50		
Doellianum. A variety with small rosettes and gray foliage.	.25	2.50		
SHASTA DAISY —(See <i>Chrysanthemum Maximum</i>).				
SIDALCEA—Rosy Gem. Erect spikes with small pink Hollyhock-like flowers. 2-3 ft.	.25	2.50		
SPIRAEA FILIPENDULA FL. PL. This is a very valuable little plant either for the front of the border or the rock garden. It grows about 10 inches high and produces masses of double white flowers, during late June-July.	.35	3.50		
SILENE SCHAFTA. A very dwarf late blooming rock garden plant with rose colored flowers during September. Height 4-5 inches.	.25	2.50		
SISYRINCHIUM—Bermudianum. Grass-like foliage and pretty flowers in a lovely shade of blue. 6 inches.	.25	2.50		
STACHYS—Lanata. A good plant for borders or rockery with woolly gray foliage. The flowers are best kept off as they are rather uninteresting.	.25	2.50		
STATICE—Latifolia —(Sea Lavender). Leathery foliage and clouds of lavender flowers which can be dried for winter bouquets. 18 inches. July and August.	.25	2.50		
STOKESIA—Cyanea —(Cornflower Aster). A lovely low growing perennial with large, Aster-like blue flowers during July and August.	.25	2.50		
Cyanea Alba. A white variety of the former.	.25	2.50		
SWEET WILLIAM —(see <i>Dianthus Barbatus</i>).				
THALICTRUM—Aquilegifolium. A lovely border plant with foliage not unlike the Columbine and feathery heads of rose-pink flowers during July. 3 ft.	.30	3.00		
Aquilegifolium Album. This is a white variety highly recommended.	.30	3.00		
Minus. A very pretty plant for the rock garden with very fine maidenhair fern-like foliage. 8 inches.	.25	2.50		
SANTOLINA INCANA. A very pretty herb of dwarf shrub-like growth with gray aromatic foliage. It is a lovely subject for edging the herb or formal garden as the plants may be clipped into a dwarf hedge. Also a beautiful plant when used as specimens in the border or rock garden.	.35	3.50		
THERMOPSIS—Carolinianum. One of the finest garden plants with long spikes of yellow Lupine-like flowers. 5 ft. July.	.35	3.50		
THYMUS—Azoricus. A very pretty Thyme of easy culture, forming mats of green foliage with rosy-purple flowers. Very sweet scented.	.35	3.50		
Citroidorus Aurea. A lemon scented Thyme with golden foliage.	.25	2.50		
Fragrantissima. An upright growing Thyme with extremely sweet scented gray foliage. 6 inches.	.40	4.00		
Herba Barouua. This is the Caraway-scented Thyme, very rare and interesting, of trailing habit.	.40	4.00		
Serpyllum Coccineus. A very low-growing variety with deep green foliage turning bronzy-green in the autumn. Deep crimson flowers during July.	.25	2.50		
Serpyllum Album. A pure white variety of the above with light green foliage.	.25	2.50		
Serpyllum Lanuginosus. This is the favorite woolly Thyme with light gray foliage and crimson flowers. Must be planted in well-drained location.	.25	2.50		
TUECRIUM—Chameadrys. This little plant has deep green foliage which may be clipped to 3-4 inches from the ground, which makes it very valuable as an edging plant in the formal or Herb garden. (\$15.00 per 100)	.25	2.50		
TRITOMA—Pfitzeri —(Red Hot Poker). A splendid cut flower, producing orange-red spikes from late July until frost. Heavy clumps.	.50	5.00		
TROLLIUS —(Globe Flower). Great improvements have been made in this popular perennial which will grow in sun or partial shade. Most varieties grow about 2 ft. in height producing butter-cup-like flowers during June. When cut down they throw up occasional flowers during the summer. They prefer a rich, fairly moist soil.				
Europeus. A neat growing variety with rich yellow flowers.	.25	2.50		
Ledebouri. Beautifully frilled flowers with a cushion-like center. Deep orange.	.35	3.50		
VALERIANA—Officinalis. This is the Garden Heliotrope growing to a height of four feet. Clusters of small white flowers which are fine for cutting. Very fragrant.	.25	2.50		
Coccineus. A dwarf-growing variety with pretty crimson flowers during July and August. 2 ft.	.25	2.50		
Coccineus Alba. A white form of the above.	.25	2.50		

VERONICA

The Veronics form an interesting group of border perennials and Alpines, and are among our most valuable garden flowers, especially where tones of blue and purple are desired. They grow in most any location and are not fussy about soil.

Armena. (See SPECIALTIES).	<i>Each</i>	<i>Dozen</i>
Incana. Pretty gray foliage and spikes of deep purple flowers in June. Fine for the rockery or border.	.25	2.50
Longifolia Subsessilis. (See SPECIALTIES).		
Repens. A lovely dwarf species, forming dense mats of light green foliage which are completely covered with light lavender flowers in May. Fine for growing between flags.	.25	2.50
Rupestris. Bright blue flowers during May and June. 6 inches.	.25	2.50
Rupestris Nana. This is a gem for the rock garden, forming dense mats of dark green foliage which are completely covered with deep blue flowers during May and June.	.30	3.00
Rupestris Alba. A pretty white variety.	.30	3.00

Rupestris Roseus. A very good pink variety. *Each* *Dozen*
 .30 3.00

Spicata. A very good border variety with spikes of flowers in shades of blue from June on.25 2.50

Spicata Rosea. Neat tufts of foliage from which rise 18-inch spikes of rose-pink flowers during July.25 2.50

VERBENA—Canadensis. This hardy Verbena is similar to the annual varieties with crimson flowers throughout the entire summer. It is a rapid grower and it is advisable to cut the plant down a couple of times during the summer after which a new crop of flowers appears.25 2.50

VIOLA—Jersey Gem. The most satisfactory Viola of compact habit and a continuous bloomer. Flowers are deep purple.25 2.50

G. Wermig. A pretty little Viola with masses of lavender flowers throughout the summer. Very good for front of border or rock garden.25 2.50

G. Wermig White. A pure white variety of the foregoing.25 2.50

Viola Hybrids

Arkwright Ruby. A lovely Viola of recent introduction. *Each* *Dozen*
 .20 2.00

Mauve Queen. A pretty mauve colored Viola with good sized flowers.20 2.00

Rose Queen. An unusual color in Viola. Large, old rose colored flowers.20 2.00

W. H. Woodgate. A very fine large flowered variety of dark violet color.20 2.00

White Perfection. Very free flowering pure white variety.20 2.00

Yellow Queen. Golden yellow flowers of good size. Very free flowering.20 2.00

HARDY LILIES

Like Delphinium, the Lilies are real aristocrats of our gardens. Contrary to the belief that Lilies are hard to grow, they grow in any well drained garden soil. Care should be taken that the bulbs do not come in contact with manure. Where the garden soil is not too well drained, it is well to set the bulbs in a bed of sand when planting.

LILIUM AURATUM—(Golden Lily of Japan). This Lily grows from 4-6 ft. in height, bearing clusters of large white flowers spotted with dark red dots and a band of golden yellow through the center of each petal. Should be planted from 8-10 inches deep. In bloom during July and August *Each* *Dozen*
 .30 3.00

CANDIDUM—(Madonna Lily). This old-fashioned favorite is well worth a place in the garden. Blooming in June, it is excellent for planting with Delphinium. These should be planted during September and we offer them for delivery at that time.35 3.50

SPECIOSUM ALBUM. A very beautiful pure white Lily. Does not do well in shade. 3-4 ft. August and September.30 3.00

SPECIOSUM RUBRUM. White flowers thickly powdered with rose-colored dots and slightly flushed with pink. August and September. 3-4 ft.30 3.00

REGALE—(Royal Lily). A very early flowering Lily and one of the most handsome. The flowers are enormous, waxy white, suffused with yellow in the throat. The blooms are produced in large clusters. They are of slender growth and it is well to plant them so they may lean forward to the sun, for instance, along a wall. Very fragrant.30 3.00

TIGRINUM SPLENDENS—(Tiger Lily). Extremely showy and easily grown, producing quantities of brilliant orange-red flowers, spotted with brownish-black. Should be planted quite deep and prefers full sun.30 3.00

LAWN SEED

A lovely lawn is not obtained by accident. It is produced by means of good seed and fertilizer combined with favorable soil and weather conditions. Be certain, then, that the seed and fertilizer you use are good.

Thousands of the finest lawns in the country owe their lasting beauty to Scott's carefully blended seed. It produces deep-rooting perennial plants. To eliminate the danger of introducing weeds in your lawn, it is cleaned and recleaned until it becomes 99.91% weedfree. The waste matter is also removed so that pure seed remains. That is why we feature Scott's Lawn Seed.

The complete Scott line is available in our garden department. The most widely used item is Scott's Lawn Seed, composed of imported and domestic grasses suitable for open, sunny lawns. Scott's Shade Mixture is prepared for use where sunlight is limited.

Scott's Lawn Seed	
1 lb.	\$.60
3 lbs.	1.75

HYBRID TEA ROSES

These are the everblooming roses, which we supply in strong, healthy potted plants. Our stock has been grown in the field for two years after which it has been potted and pruned back properly.

When our customers receive these roses during May they have a good start and can be planted from the pots into the garden without the least set-back to the plants.

Our roses are exceptionally fine and will give a succession of flowers the first season.

These roses will be ready after May 1st and may be planted throughout the month of June.

OUTSTANDING ANNUALS

AGERATUM CARDINAL MUNDLEIN.

This new Ageratum is a great improvement over the older varieties. It is fairly dwarf in habit which makes it most valuable as an edging plant. The flowers are of a lovely lavender blue shade and are borne in great profusion through the entire Summer.

From 2¼" pots 10c each—1.00 doz.— 8.00 per 100
 From 3" pots 12c each—1.25 doz.—10.00 per 100
 From 3½" or 4" pots 20c each—2.25 doz.—18.00 per 100

VINCA MADAGASCAR ALBA. This

lovely pure white annual is not known well enough by garden lovers. The plants are of very neat habit, which make them valuable for the formal garden. They grow about 15 inches high and are completely covered with pure white flowers. We cannot recommend them too highly. Well established plants from 3" pots
 25c each—3.00 dozen—23.00 per 100

PETUNIA GARDENIA FLOWERED.

This lovely pure white Petunia has masses of flowers which truly resemble Gardenias. The plants are of sturdy habit and free bloomers.
 Strong plants 25c each—3.00 per dozen—23.00 per 100

IMPATIENCE. For shady places where a touch of color is desired, there is no plant that will give greater satisfaction. The plants grow about two feet high and are completely covered with salmon colored flowers at all times.

25c each—3.00 per dozen—23.00 per 100

HELIOTROPE—DARK ROYAL FRA-

GRANCE. Though not as fragrant as some varieties, this Heliotrope is one of the loveliest flowers for the garden. It bears masses of deep purple flowers and is a great improvement over other varieties.

Strong plants from 4" pots
 35c each—4.00 per dozen—30.00 per 100

TORENIA. A lovely annual growing about 1 ft. in height. Plants are completely covered with deep blue flowers of which the lower petal is light blue. This annual deserves to become better known.

Plants from 2¼" pots
 12c each—1.25 per dozen—10.00 per 100

MARIGOLD CROWN OF GOLD. This

new Marigold has odorless foliage. The flowers have short curled centers with a color of flat petals on outside. Plants grow about 2½ feet tall and have masses of orange flowers. 8c each. 75c doz. 6.00 per 100

DWARF HYBRID DAHLIA. These dwarf

Dahlias are lovely for cutting and make a real show in the garden throughout the summer. We supply plants from 2¼" pots at 12c ea. 1.25 per doz.
 From 3" pots. 15c each, 1.50 per doz.

ANNUAL VINES

MORNING GLORY. Heavenly Blue. From

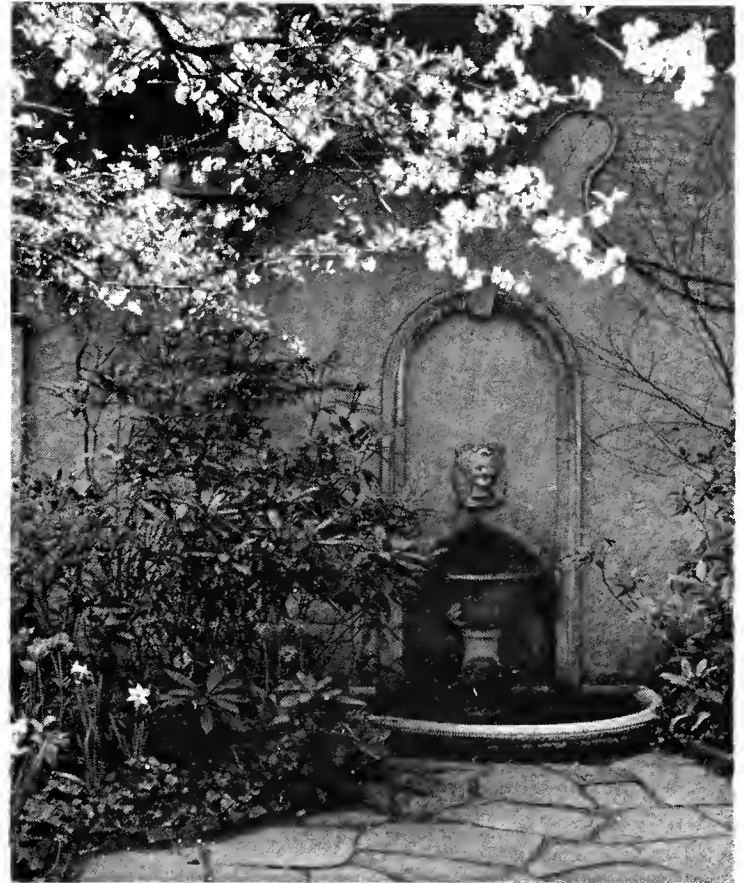

2¼" pots. 12c ea. 1.25 doz. 10.00 per 100

MOON VINE. From 2¼" pots.

12c ea. 1.25 Doz. 10.00 per 100

NASTURTIUMS. From 2¼" pots.

12c ea. 1.25 Doz. 10.00 per 100

GROUND COVERS

The following varieties are recommended for covering shady places where grass will not grow.

PACHYSANDRA — Terminalis — (Japanese Spurge). This evergreen ground cover cannot be recommended too highly. It will grow in either sun or shade; but, if grown in the shade the foliage will be of a much deeper green texture. We offer plants in 3 inch pots. 1.75 14.00

AJUGA—Reptans. This is a good ground cover with deep green foliage which takes on a bronzy tone in the fall and produces masses of deep blue flowers during May and June. It is a rapid grower and forms a thick cover in one season. 1.75 14.00

VINCA—Minor—(Myrtle or Periwinkle). This excellent ground cover needs no description. It is also good for edging pools and may be clipped to form a neat low hedge. Special prices on large quantities. 1.25 9.00

SHRUBS

Our list of shrubs is not as large as that of many nurseries, but we have selected a few varieties which we feel should find first place on the home grounds.

Should you be interested in material not listed here, we will be glad to quote prices on any stock you may wish.

	<i>Each</i>	<i>Dozen</i>
ALTHAEA —(Rose of Sharon). The Althaeas are very showy and ornamental shrubs of upright growth, giving a touch of color to the shrubbery border in late Summer.		
JEANNE D'ARC . A fine double white variety. 3-4 ft.	\$.60	\$6.00
PAEONIFLORUS . A good pink variety. 3-4 ft.60	6.00
BUDDLEIA —(Butterfly Bush).		
ILE DE FRANCE . Very superior to the old fashioned Butterfly Bush. Strong plants.75	7.50
DEUTZIA — PRIDE OF ROCHESTER . An erect growing shrub with masses of double white flowers.50	5.00
EUONYMUS — ALATUS . This shrub grows into a beautiful specimen and is very effective when planted, as foliage turns to a pleasing red in the Fall. Also very good for large hedges. 3-4 ft.75	7.50
FORSYTHIA . This well known shrub needs no description.		
INTERMEDIA . Upright grown 3-4 ft.65	6.50
SUSPENS A. Drooping variety. 3-4 ft.65	6.50
HYDRANG EA— PANICULATA GRAN-DIFLORA . This is the well-known Fall blooming Hydrangea. Strong plants.50	5.00
KOLK WITZIA AMABILIS — (Beauty Bush). This is truly a beautiful shrub, has long graceful sprays of foliage and is completely covered with delicate pink flowers during June. 3-4 ft.	1.00	10.00

	<i>Each</i>	<i>Dozen</i>
PHILADELPHUS —(Mock Orange).		
AVALANCHE . Handsome shrub with drooping branches covered with snowy white, fragrant flowers. June. 3-4 ft.65	6.50
SPIRAEA — THUNBERGI — (Bridal Wreath). A very graceful shrub bearing an abundance of small white flowers in long sprays during May. 3-4 ft.65	6.50
VANHOUTTEI . Also a lovely shrub producing graceful sprays of white flowers. 3-4 ft.65	6.50
SYMPHORICARPOS . These shrubs are particularly valuable for the berries they produce during late Summer and Fall.		
RACEMOSUS —(Snowberry). A graceful shrub with waxy berries lasting well into the Fall. 3-4 ft.65	6.50
VULGARIS —(Coral Berry). A fine shrub with deep red berries lasting through the Winter.65	6.50
WEIGELA ROSEA . A vigorous growing shrub and a very fine bloomer. Large deep rose blooms in May. 3-4 ft.65	6.50

HEDGE PLANTS

BERBERIS THUNBERGI (Barberry). 18-20"	20c each. 2.00 Doz. 15.00 per 100
PRIVET . In various sizes. From 6.00 to 12.00 per 100
